

AGUSTIO MAITIMU

Swift Developer

Bali, Indonesia | (+62) 813 4304 1308 | agustiomaitimu.apple@gmail.com | [Portfolio Site](#)

SUMMARY

Swift developer with hands-on experience shipping multiple apps to the App Store, both independently and in cross-functional teams with designers, PMs, and developers. Skilled in multi-platform Apple development (iOS/iPadOS, macOS, watchOS) with strengths in SwiftUI interfaces, data persistence, widgets, and integrations. Experienced with collaborative GitHub workflows (code reviews, merges, release stabilization) and trained in design thinking, accessibility, and UI/UX practices to deliver polished, user-centered products in fast-paced, iterative cycles.

EXPERIENCE

Apple Developer Academy @BINUS - Bali

Mar 2025 – Dec 2025

- Enrolled in an intensive 10-month program blending Apple ecosystem development (iOS/iPadOS, macOS, watchOS), design thinking, and professional skills.
- Delivered multiple App Store-published apps in multicultural teams (4–6 members), practicing the full lifecycle from ideation to release.
- Contributed across frontend (SwiftUI interfaces, navigation, widgets) and backend (data persistence, pipelines, integrations), while maintaining GitHub health through reviews, merges, and release stabilization.
- Applied UI/UX principles, accessibility, and cross-platform design practices to balance technical and design perspectives in iterative development.

Portfolio Development (Frontend Web)

Aug 2023 – Oct 2024

- Self-taught React, Next.js, Tailwind CSS, and modern Git/GitHub workflows.
- Built and deployed responsive, component-driven web apps on Vercel, including [a frontend dev portfolio site](#) showcasing web projects.

PROJECTS

Keepsake – iOS widget-based camera app

May 2025 – Jun 2025 · Actively maintained

- Built a customizable Home Screen widget that lets users assign per-widget albums and deep link directly into the camera, powered by AppIntents + App Groups for seamless app–widget data sharing.
- Implemented accurate widget previews, TipKit onboarding, and StoreKit review prompts to refine UX.
- Added advanced camera features: multi-lens zoom with haptics, tap-to-focus, exposure controls, and mirroring fixes.

SwiSekai – macOS Swift learning platform

Jul 2025 – Aug 2025 · Actively maintained

- Built the YAML-to-content pipeline and a SwiftData user model with Keychain-secured API key storage for an in-app AI companion (OpenAI/Gemini).
- Implemented navigation, responsive Projects UI, and contributed to responsive Home UI; maintained GitHub stability through PR merges and conflict resolution.

Memmy – iOS checklist app

Apr 2025 – May 2025 · Actively maintained

- Developed solo a full checklist experience with SwiftData persistence, custom flows, search/sort, batch delete, daily reset, animated progress bars, and accessibility support.
- Implemented a configurable Home Screen widget (AppIntents + App Groups) for deep linking and seamless app–widget data sharing.

EDUCATION

Universitas Siber Asia – B.S in Information Systems

Mar 2023 – Present
